SUMMARY

I am an experienced Flutter and Full-Stack Developer with over five years of hands-on experience with building user-friendly and responsive applications. With my expertise in Dart, Flutter, React.js, Node.js, Python, and Laravel, I am capable of delivering efficient, scalable solutions for both mobile and web platforms. Keeping up with the latest technology and crafting clean interfaces are my passions, and I am dedicated to ensuring the best possible results for each project.

EXPERIENCE

Node.js	Express.js	Python	Java	Kotlin	Laravel	Firebase	Supabase
REST API	GraphQL	Socket.io	MongoDB	MySQL	PostgreSQL	Git	Postman
CI/CD	Figma	Riverpod	Provider	Bloc	GetX	Redux	React Query
MVC	MVVM	FastAPI	FlaskAPI	Webhooks	Tailwind	WebRTC	Unit Test
TanStack	AWS	Cloudflare	Bootstrap	MaterialUI	ChakraUI	GSAP	FramerMotion

PROJECTS

Parking Management System (Officer-Side Application)

- Developed an officer-side parking management application that supports 190+ client configurations within a single codebase. The application is built as a SaaS platform, where features, workflows, and themes are dynamically managed through backend configurations. This approach allows the same application to serve multiple clients with different requirements while ensuring easy maintenance and scalability.

Neon

- Neon is a multiplayer gaming platform for classic board games like Checkers, Dots and Boxes, and Nine Men's Morris. It enables social gameplay, competitive matches, and secure in-app purchases of digital assets like Gold and Silver.

Cheetah

- Cheetah is an educational app for grades 5–7 offering quiz games, practice tests, and mock exams. It tracks performance, awards badges, and recommends personalized tests to enhance learning outcomes.

Rocket Chess

- Rocket Chess is an online/offline chess platform with competitive play against friends or random opponents. It includes a skill-only mode, chat features, and fosters strategic thinking in a social environment.

StudyAK

- StudyAK is a learning platform aggregating courses across multiple fields like Cybersecurity and Data Science. Users can access content, take assessments, download offline material, and create/share their own courses.

Talk About It

- Talk About It is a mental health platform connecting users with psychiatrists via chat, video, or messaging. It provides personalized support for stress, grief, nutrition, relationships, and teenage mental health.

Marquel Wrecking Customer

- Marquel Wrecking Customer is a towing service app in Jamaica that allows users to request vehicle recovery easily. It calculates service costs based on distance and special circumstances, offering fast, reliable assistance.

Additional work experience includes projects under **NDA**; specific details will be shared during interviews.
